

Rubber Floor Product Catalog

UDINE Rubber Floor Tiles

Shock Absorbing Buffer Column Design*1

Cylindrical distribution decompression design can effectively **increase the motion buffer**, reduce the impact of equipment on the ground, and **protect your joints** to a certain extent; A cavity is formed at the bottom to **reduce noise propagation** and achieve noise reduction effect. At the same time, this design greatly **reduces the weight** of the product.

Eco-Friendly Materials And 5 Years Warranty*2

Strictly select new **environmental friendly and high-quality rubber particles**, and through rigorous processing procedures, make the cushion structure more dense and have better shock absorption and compression resistance. Therefore, we have enough confidence in our products to provide you with up to **5 years of quality assurance**.

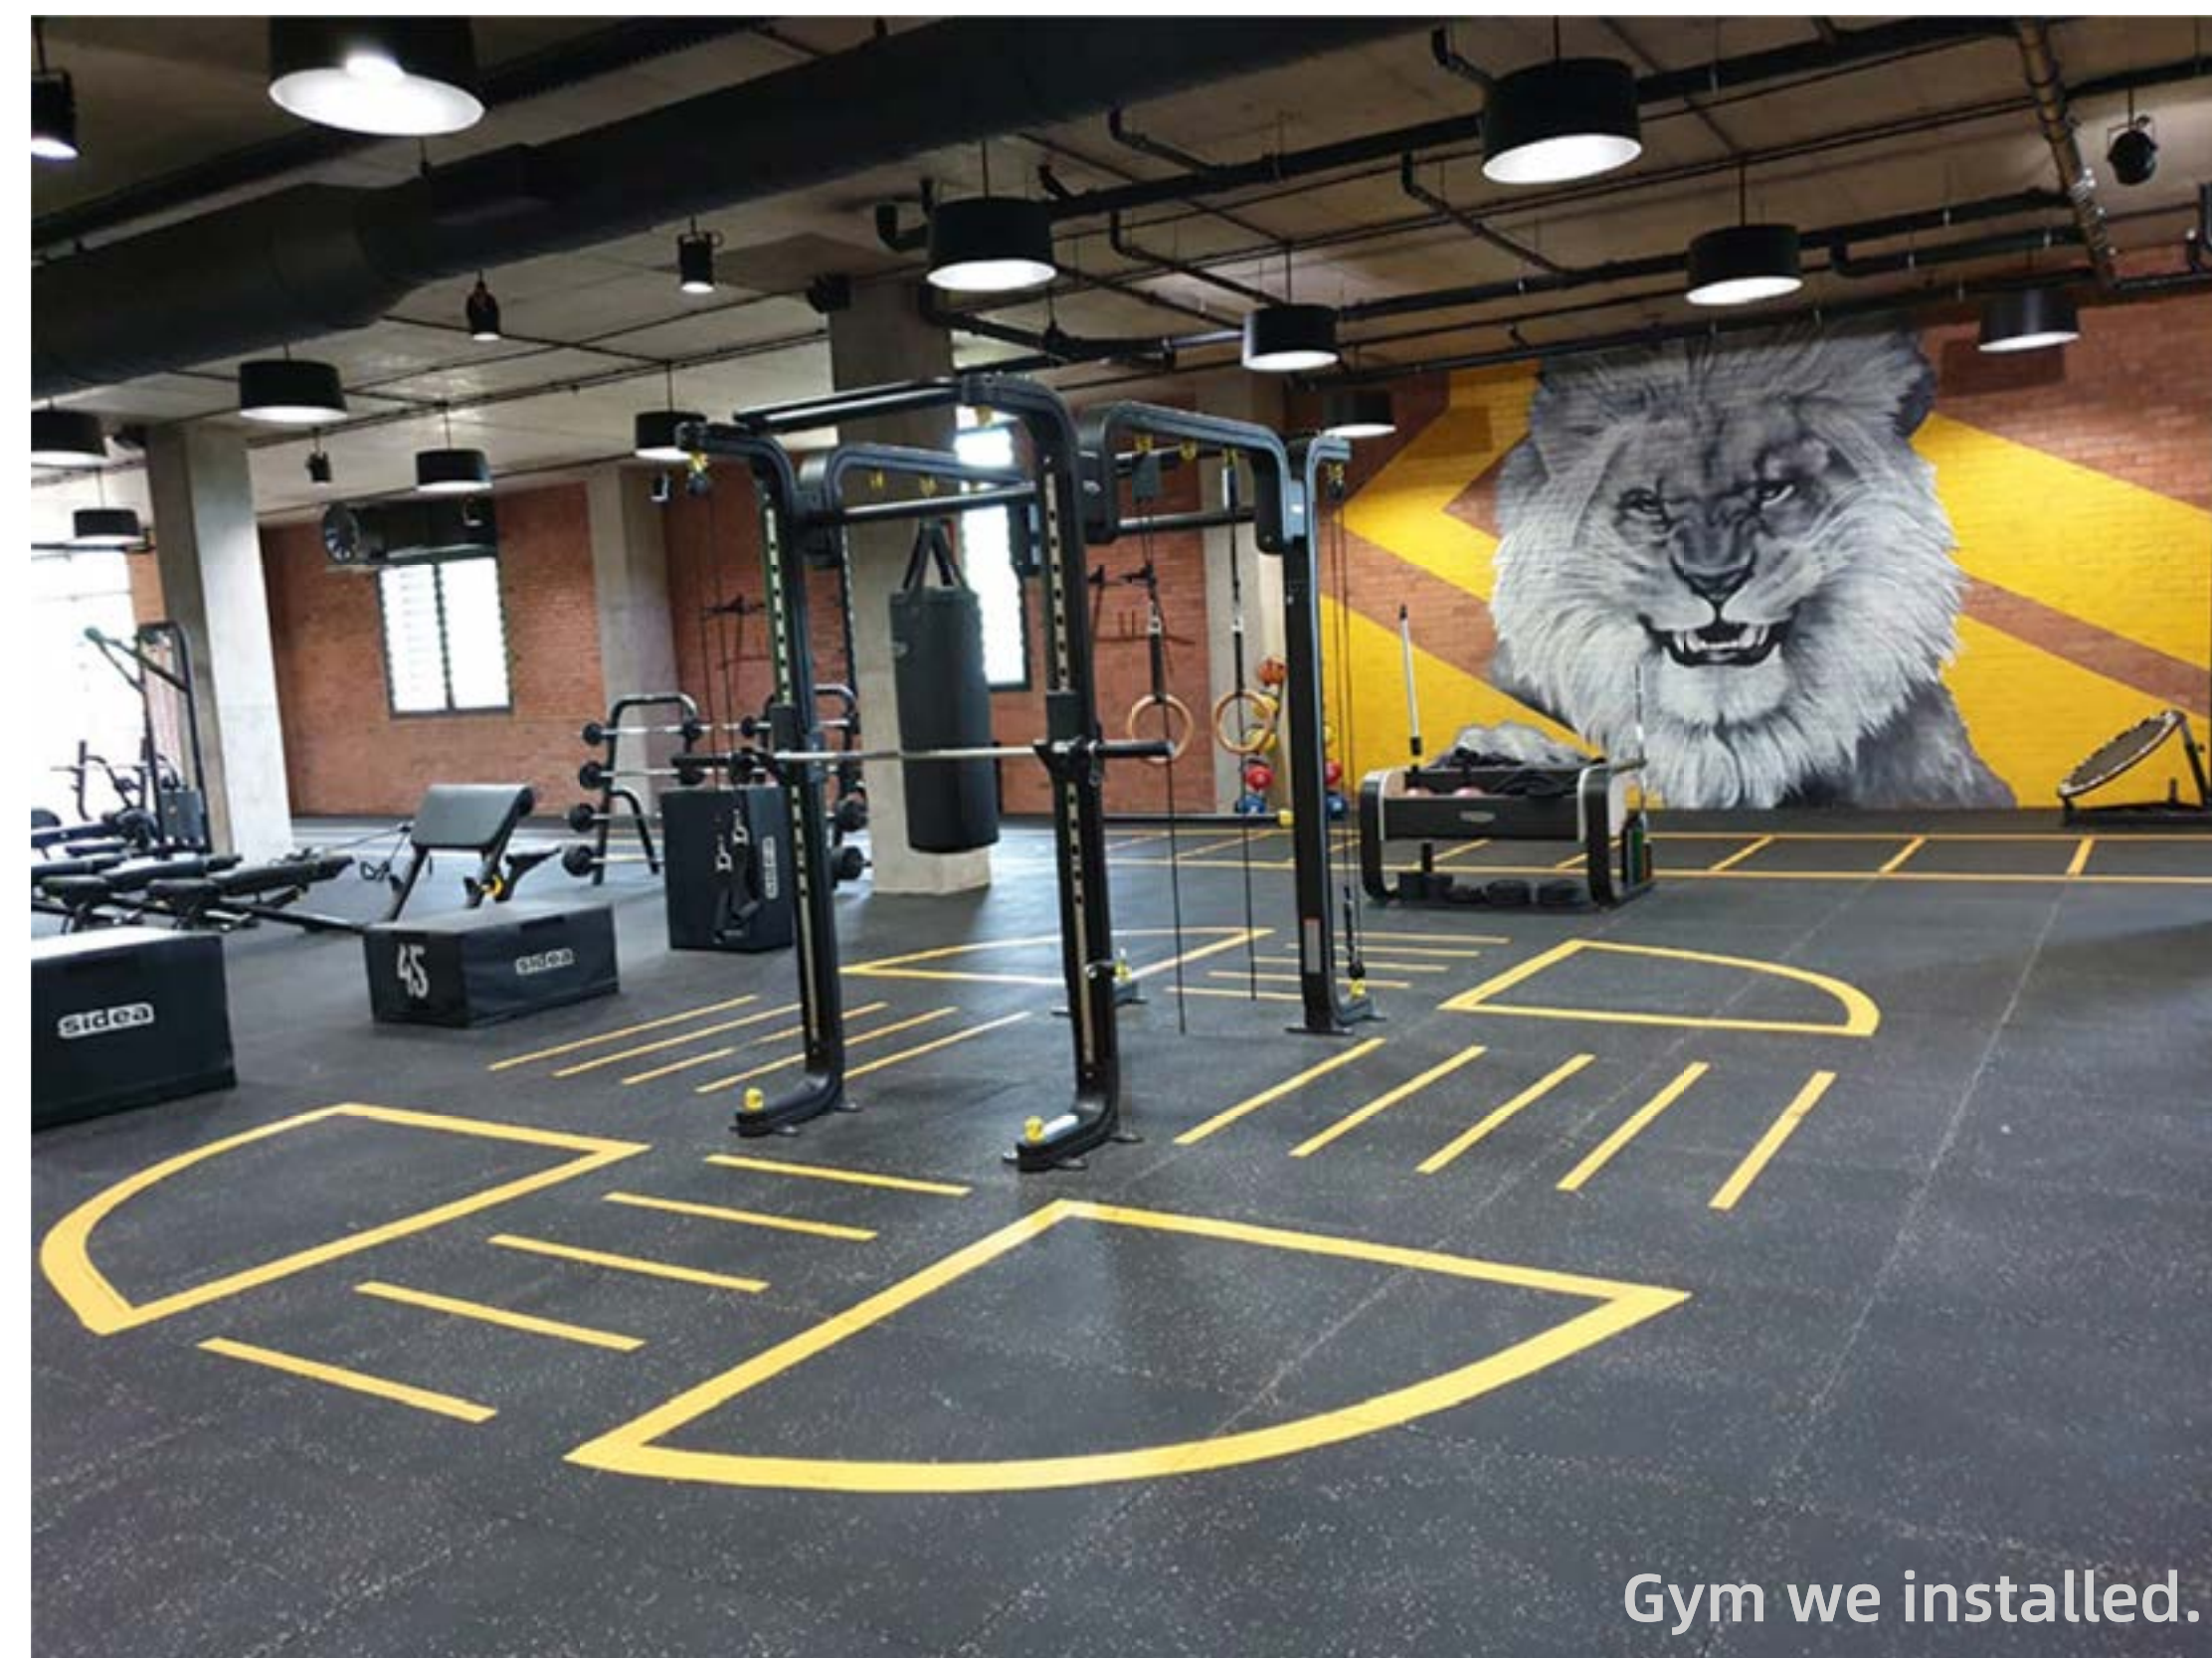

Easy To Clean

The new generation Gym Rubber Floor is characterized by large squares comprising of rubber. And, its unique composition and architecture provide a flat surface that is easily cleaned.

*1 This design is adopted for above 20mm, and the bottom below 20mm is flat bottom.
*2 The 5-year warranty is limited to normal-intensity use indoors.

Gym we installed.
